Automatic Button Shank Wrapping Machine

buttonfuse® technology since 1994

## buttonfuse® revolver

**Auto-feed  
mechanism**

No RFID!   
Use any TF thread

**Designed for shirts & blouses**

super-fast  
button  
feed

perfect  
results  
everytime

Adjust machine settings with  
the MMS bluetooth APP

new &  
improved  
display

The buttonfuse® **revolver** is a revolutionary machine designed to deliver exceptionally smooth, high-speed production. Its rotating disc locks each button in place during wrapping, allowing the next button to be fed before the cycle even finishes creating a faster, more efficient workflow. In addition to saving time, the hands-free wrapping ensures highly consistent results, eliminating the risk of premature removal and uneven heat sealing.

### FEATURES

- Automatic button feed mechanism is super easy to use and requires very little operator training
- Up to 25% increase in output, boosting overall productivity
- Automatically ejects buttons after wrapping
- Automatic waste extraction
- Connect & control settings with the MMS bluetooth APP
- Maximum button diameter 18mm

### TECHNICAL SPECIFICATION

Dimensions..... 30 x 20 x 23cm  
Box Dimensions..... 42 x 32 x 41cm  
Weight (Net)..... 10.4kg  
Weight (Gross)..... 11.5kg  
Electrical Supply..... 100/240V  
Air Supply..... 5.5 bar / 80 psi  
Air Consumption..... 0.85m³/hour

# Looking to **MAXIMISE** productivity?...

buttonfuse® technology since 1994

## buttonfuse® revolver

## Continuous downward button feed

In order to **achieve a consistently high standard of button shank wrapping** it is essential that the shank length (X) is of sufficient length. Failure to achieve this will reduce the yield per cone and render the wrapping less effective in securing the button. **This is a simple setting on most button attaching machines.**

GARMENT TYPE	SHANK LENGTH 'X' (before wrapping)	NUMBER OF WRAPS	APPROX. NUMBER OF BUTTONS PER CONE (using buttonfuse® revolver)	APPROX. NUMBER OF BUTTONS PER HOUR (using buttonfuse® revolver)
Shirts	2.5mm	7	11,100	1,950

## buttonfuse® TF thread

We have the world's largest range of threads + our high stockholding levels mean that they are readily available exactly when you need them most. Request our shade card or download from our website for full details.

As pioneers in innovative fusing technology, our unique range of button wrapping machines offer the biggest, fastest output currently available on the market.

**Our products are so easy to use, provide consistent quality & all with minimal thread waste.**

With over 30 years of experience, our machines are made in the UK & built to last. Plus our global accredited support network means that our impeccable servicing is maintained at all times.

*\* Dependent upon wrap number & handling. This data is collected using MMS buttonfuse® TF thread & with the buttonfuse® revolver machine set to it's minimum thread waste setting for the particular button type.*

**Our thread is proven & specified by the major brands of the world** & is the ideal partner to the buttonfuse® range of machines. The high quality components guarantee button security from shirts to raincoats.
