

buttonfuse[®] classic

Automatic Button Shank Wrapping Machine

buttonfuse[®] technology since 1994

buttonfuse[®] classic_T

Our proven, cost-effective workhorse is still a firm favourite!

It's reliable single button operation couldn't be easier!

Our buttonfuse[®] classic machine (previously known as the MK11) is trusted worldwide for its exceptional reliability and its ability to securely attach large-diameter buttons, delivering complete, long-lasting protection against button loss for the lifetime of every garment.

buttonfuse[®] classic_T SPECIFICATION

- 3 programs - standard button, shank button & long shank
- Precise computer controlled regulation of wrapping process
- Simple to use, even by unskilled operators
- Can handle button diameters up to **48mm**

TECHNICAL SPECIFICATION

Dimensions.....	33 x 40 x 20cm
Box Dimensions.....	46 x 45 x 36cm
Weight (Net).....	13.7kg
Weight (Gross).....	15.7kg
Electrical Supply.....	100/240V
Air Supply.....	5.5 bar / 80 psi
Air Consumption.....	0.85m ³ /hour

The world's best selling button wrapping machine!

Suitable for jackets and raincoats with **large button diameters**

A single button operation makes this model simple to use!

Iconic design is very familiar to operators worldwide

buttonfuse® TF thread

Thermo Fuse Button Wrapping Thread

buttonfuse® technology since 1994

What is it?

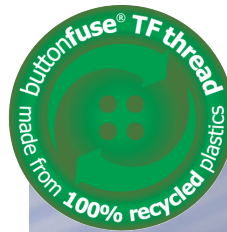

MMS buttonfuse® **TF thread** is an elastic heat-sealing thread designed for secure button wrapping. It is strong, reliable and leaves no loose ends which can occur with other threads.

How does it work?

The TF thread is wrapped under tension around the main sewing threads, creating a super tight grip. Heat is then applied to fuse the shank, preventing button loss.

Why use it?

MMS buttonfuse® **TF thread** is used worldwide by major brands as it guarantees button security for the lifetime of the garment. It is certified by Oeko-Tex, complies with all other industry standards and has been tested to withstand all types of garment finishing and washing.
